IT320: – Practical Software Engineering
ATHR Manual

ATHR Color Palette:

Important Notes About our Design:

- 1- As discussed with Dr. Nouf and I. Ghiyda we changed the software we will work with from Android Studio to FlutterFlow, we thought it would be important to highlight this to avoid any misunderstandings.
- 2- In Athr, users can rate their experience ONLY after it's done (based on date), and their rating will be shown in My Reservations tab, later on **Ratings** are calculated and shown on the experience page.

- 3- When sharing a post in the community hub, users have to upload their own pictures, the image shown just to serve an example.
- 4- Top Workshops in Home Page is based on ratings (experiences with highest ratings will be shown on there).
